POP-Declaration regarding Regulation (EU) 2019/1021

Last actualisation according regulation (EU) 2022/2291 (10.06.2023)

Supplier: BBC Cellpack Electrical Products
BBC Cellpack GmbH
Carl-Zeiss-Straße 20
79761 Waldshut Tiengen

Persistent organic pollutants (POPs for short) are organic substances with certain properties that can be harmful to humans and the environment. They are regulated at EU level by the POP Regulation as well as worldwide by the Stockholm Convention. At European level, the two aforementioned international agreements are transposed into European law by "Regulation (EU) 2019/1021 of the European Parliament and of the Council of 20 June 2019 on persistent organic pollutants" (POP Regulation).

Persistent organic pollutants are organic compounds that are characterised by the fact that they:

- remain in the environment for a long time (persistence),
- accumulate via the food chain (bioaccumulation),
- may harm human health and the environment ((bio-)toxicity)
- have the ability to be transported in the environment over long distances.

The provisions of the POP Regulation apply to substances included in its Annexes I and II. Annex I contains the list of prohibited substances; Annex II contains the list of substances that are subject to restrictions. Article 3 of the POP Regulation prohibits the production, placing on the market and use of substances listed in Annex I. These prohibitions also include mixtures or articles containing such substances.

According to our current knowledge, based on the documentation (safety data sheet, technical data sheet and Declarations of Conformity) provided by our suppliers of both raw materials and finished products, we confirm that our products distributed by BBC Cellpack do not contain persistent organic pollutants in accordance with the POP Regulation (EU) 2019/1021 Annex I. The corresponding statements were not checked by BBC Cellpack GmbH by laboratory analyses and are based on the information of all manufacturers associated with our product portfolio, as well as our raw material suppliers.
